Werneth, Ron. *Beyond Pearl Harbor: The Untold Stories of Japan's Naval Airmen*. Atglen, Pa.: Schiffer Books, 2008. 256pp. \$59.95

Ron Werneth has gone above and beyond the call of duty to produce a detailed perspective of the Japanese airmen of World War II. Werneth spent nearly a decade living in Japan and immersing himself in its culture. He traveled extensively to obtain firsthand accounts of seventeen Japanese naval veterans.

The book is divided into three sections, providing discussions of veterans of Japanese carrier bombers (*kanbaku*), Japanese carrier attack planes (*kanko*), and Japanese fighter aircraft (*kansen*). However, not all accounts are from aviators; some are from maintenance personnel and navigators. The veterans' accounts provide details of these men's lives, an approach that humanizes them, especially for Americans who may still bear ill will toward the Japanese.

One Japanese veteran, Ensign Takeshi Maeda, was instrumental in attacking and sinking USS *West Virginia*. Takeshi Maeda tells the remarkable story of how in 1991 he was invited to the fiftieth anniversary of Pearl Harbor. At the event, which his family had not wanted him to attend, he met a *West Virginia* survivor, Mr. Richard Fiske. Maeda told Fiske that he was sorry for attacking Pearl Harbor, and Fiske responded by graciously telling Maeda that he had just been following orders and it was not his fault. Not only did this help Maeda personally, but it also provides us a larger perspective of the war, especially Pearl Harbor.

It is fascinating to learn that a number of its participants had been totally unaware of the planned attack on Pearl Harbor

until the days immediately preceding 7 December. One veteran, Ensign Yuji Akamatsu, states that he never doubted that attacking Pearl Harbor was the right thing to do, in view of the economic hardships Japan was facing. However, many other veterans' accounts explain how the attack was either a bad idea or how they were just doing their jobs for their nation, and offering their own patriotic perspectives.

Werneth has a fascinating writing style and makes the stories come alive with his carefully chosen words, explanations of details and Japanese terms, and use of illustrations. He did an outstanding job acquiring photographs of the Japanese naval airmen, both old and new, including photos of ships, planes, and actual attacks.

This book is an absolute must-read for any naval aviator or student of the World War II Pacific theater.

What is it like to lead and work for America's largest privately owned company, one that finds, transports, processes, and ultimately delivers a product essential to the operation of almost everything in the developed world? This product is found hundreds to thousands of feet below the surface of the earth, from the deserts of the Middle East to the Arctic, as well as many miles beneath the ocean. It is located in areas of the world that are isolated, disease ridden, politically unstable, and often right in the middle of armed conflicts.
