It has been accepted for inclusion in Naval War College Review by an authorized editor of U.S. Naval War College Digital Commons. For more information, please contact repository.inquiries@usnwc.edu.
“Final Solution” and how a nation so seemingly advanced could have carried out such monstrous crimes. The crux of Kershaw’s argument is that the führer’s “charismatic domination” of the German people through a potent mix of ideological zeal coupled with his great skills in the art of propaganda paved the way for the “Final Solution.”

On 30 January 1939, Hitler delivered a lengthy speech in the Reichstag in which he threatened the “annihilation of the Jewish race in Europe” should the Jews “succeed in plunging the nations once more into a world war.” As Kershaw notes, Hitler and his underlings would repeatedly cite that “prophecy” over the course of the next three years, as planning for the “Final Solution” intensified. (Interestingly, as the war dragged on, the date of the “prophecy” speech was deliberately altered by the regime in its propaganda broadcasts to 1 September 1939, to link it with the onset of the war.) In 1942 alone, Hitler referred to his “prophecy” in four nationally broadcast radio addresses designed to, as Kershaw puts it, “condition the general population against humanitarian sympathy for the Jews” and, most disturbingly, signal to the regime’s insiders Hitler’s “knowledge and approval of the genocide.”

Kershaw believes that one of the major milestones on the road to a “comprehensive solution” of the “Jewish question” was Hitler’s declaration of war against the United States on 11 December 1941. The propaganda minister, Joseph Goebbels, noted in his diary on 13 December that “the Führer is determined to make a clean sweep. . . . The world war is here. The annihilation of the Jews must be the necessary consequence.” A little over five weeks later, the infamous Wannsee Conference convened to plan, as SS-Obergruppenführer Reinhard Heydrich put it, “the coming final solution of the Jewish question.” What had until that point been a localized and somewhat “inefficient” extermination effort was transformed into a Reich-wide, comprehensive genocide. None of this, as Goebbels noted in March 1942, was possible without the führer’s presence as the “unswerving champion and spokesman of a radical solution” to the “Jewish question.”

Kershaw is to be commended for this collection of essays, which, coupled with a reading of his two-volume biography of Hitler, should be required reading for any serious student of Nazi Germany and the Holocaust. We owe a debt to Kershaw for the unpleasant but essential enterprise of helping future generations grapple with one of the most squalid episodes in the history of mankind.

Naval War College
the maritime countries as they emerged
into national states. The objective of
this book is to study not war but the de-
velopment of charts and their use in
warfare.

The book is written for the general pub-
lic, not for the specialist. Although laid
out in chronological order, it does not
provide an index of the charts, which
makes it difficult to locate a specific
one. The charts are in a large format,
and their reproduction is of high qual-
ity; however, it is often necessary to re-
sort to a magnifying glass to see details.

Blake has selected a series of original
and printed charts seldom seen by the
public; they are highly appealing and
are considered secondary art in their
own right. Blake states that they were
chosen to show “how the chart can il-
lustrate, inform and comment on mari-
time history.” Each has a description
that sets it in its historical context, the
specific objective for which it was con-
structed, its originator (when known),
and its current location.

There are over 185 charts, maps, and
sketches, covering the development of
sea charts from the beginning, as well as
their design and content, with the over-
all intent of showing their importance
to the planning and execution of sea
battles. Very few sea charts, however,
have survived that show the actual
planning or progress of a sea battle.
Most sea charts of war are illustrations
of past events.

The selection came from fifteen major
archives in the United Kingdom, Eu-
rope, and the United States. Blake’s re-
search was extensive and goes into great
detail. The book covers eight specific
areas of chart making: ancient world;
the Renaissance; the Spanish and Portu-
guese empires; seventeenth-century
European, American, and Asian wars;
American independence; the French
Revolution and the Napoleonic Wars;
the American Civil War; and modern
warfare.

John Blake has written two other excel-
lent books on sea charts. He was an of-
ci er in the Royal Navy for seventeen
years, with twelve years’ active service.
In 1996 he and his wife initiated the li-
censing of maritime cartography in the
United Kingdom Hydrographic Office.
He was educated at Brighton and
Britannia Royal Naval College, Dart-
mouth, and is a fellow of the Royal In-
stitute of Navigators.
